

LOAN APPLICATION (SAF)

KyrSEFF Business Energy & Resource Efficiency Projects

Please fill in this application form and submit it to your bank. The bank will forward the loan application to the KyrSEFF Project Consultant (PC) for eligibility assessment. If your project is eligible for KyrSEFF financing, you will be contacted for the next steps, which may require a visit to your company and the collection of more detailed information.

For further information on the eligibility assessment, please refer to the website at www.kyrseff.kg. If you have questions regarding this application format, please contact the bank or the KyrSEFF office at +996 312 90 12 17.

 Anticipated completion date of the project:

Declaration of Applicant

1. We, the undersigned company, intend to enter into a loan agreement for the implementation of [project title] (the "Energy & Resource Efficiency Project") with [name of PFI], participating in the Kyrgyz Energy Efficiency Financing Facility implemented, with financial support from the European Union Investment Facility for Central Asia.
2. **The company is hereby warned that in case of full repayment of the loan before applying for the grant, the grant will not be paid.**
3. We hereby agree that the EBRD shall not be liable for any loss, cost, damage or liability which we or third parties may suffer through the EBRD's role in selecting, engaging, monitoring of the Consultants' services and as a consequence of using or relying upon the services of the Consultants.
4. We hereby declare that no other EC grant support has been/is expected to be received for the above mentioned Energy Efficiency Project.
5. We hereby agree to provide access for the Consultants to our facilities and financial, technical and other information requested by the Consultants for the performance of any technical assistance.
6. We hereby agree that the EBRD, the [name of the PFI], the Project Consultant and the EU may publish information about the Energy and Resource Efficiency Project, including naming the undersigned company, as a beneficiary under the KyrSEFF, in the context of promoting energy and resource efficiency and publicising the results/success of the KyrSEFF.

Required attachments for KyrSEFF Business Energy Efficiency (BEE) Projects

A) In case that the

- investment costs are less than 300,000 USD **and**
- planned equipment is included in the List of Eligible Equipment and Material (LEME) of the KyrSEFF Business window

Quotation or pro-forma invoice has to be provided prior to delivery/installation of eligible energy and resource efficiency equipment/materials. The quotation must contain at least the following information:

- date, name, address, legal registration of the eligible supplier/installer;
- technical specifications and details of the eligible equipment to be supplied/installed in accordance to the technical performance criteria as listed in the Business Window LEME of KyrSEFF;
- binding offer for the kinds and quantities of equipment/materials, including price;
- address of place/ facility where such Project will be installed; name, address and telephone of applicant.

B) In case that

- the investment costs are less than USD 300,000 **but**
- the planned equipment is not included in the LEME of the KyrSEFF Business window

Quotation or pro-forma invoice has to be provided prior to delivery/installation of eligible energy efficiency /water/ resource efficiency equipment/materials. In addition to the above listed information, the quotation must contain at least the following information:

- technical specifications and details of the equipment to be supplied/installed as listed in the categories of the KyrSEFF LEME Business Window;
- Brief description of the technical parameters of the existing equipment/machinery (e.g. operation mode/ hours, capacities, types and amounts of energy used).

In case the equipment supplier is not providing installation services the following information about the intended installation company need to be submitted: name, address, legal registration.

C) In case that the

- investment costs are above USD 300,000

- Energy consumption of existing equipment/machinery (e.g. operation mode / hours, capacities, types and amounts of energy used);
- Project planning documents (e.g. specification of energy saving techniques, equipment and their capacities);
- Offers from equipment suppliers, if available.

For complex projects, detailed designs/conceptual designs/energy assessment and technical specifications form part of the quotation and shall be read in conjunction therewith.
